

Granity (70m, 6b+, trad.)

Adrien Garioud & Arthur Lespagnol

May 6, 2006

Access The route is located 5 km before the village of Harbak (Trøndelag, Norway). You can park by the side of the road and belay from the car. It is easier to spot it when driving from Harbak toward Revsnes. Return by walking down from the top.

Info Short route on amazing rock. We climbed the obvious crack and finished through the roof (6b+). Make a belay just after the roof and finish with an easier pitch (5+).

Gear One set of nuts, full camalot rack until size 3.5.
